

# Excellent D&T!

## Planning, progression and practical skills in Primary Design and Technology

**Suitable for: Primary D&T subject leaders / Upper KS2 teachers**

**Thursday 19<sup>th</sup> October 2017**

**9am – 4pm**

**Leeds Industrial Museum at Armley Mills**

## Excellent D&T!

Gareth Pimley

This full day, hands-on course aims to develop delegates' confidence and practical expertise in some of the more technically demanding aspects of design and technology at KS2. The course will start with a strategic overview of D&T, including key issues raised by Ofsted, and strategies for planning, progression and assessment.

The remainder of the day will be used to develop practical skills, techniques and know-how in mechanical and electrical systems and to produce teaching aids that can be used back in school.

The course will include:

- Ofsted and Primary D&T – key issues and strategies for the subject leader
- Ensuring progression in children's learning
- Developing an assessment system
- Long and medium-term planning
- Workshop 1: Electrical systems
- Workshop 2: Mechanical systems, focusing on gears and pulleys

Delegates will be able to take the projects made in each of the workshops back to school with them. This includes all the relevant materials and equipment.

### **Cost**

**£250, including materials.**

### **NB**

If your school has purchased the **Art/s Subject Leader Package**, a member of staff can attend this training for a cost of £10 (to cover materials). This would be your Session Two option.

Additional places can be booked at a **discounted** rate of £220 (inc materials)

### **Gareth Pimley, Primary Education Consultant**

Building on his experience of teaching in Shropshire primary schools and eighteen years with Shropshire Advisory Service, Gareth Pimley is now a freelance primary education consultant. He provides advice, support and training in design and technology (D&T) to schools, local authorities, companies and other organisations. Gareth has a national reputation for his work in D&T, having previously been seconded to the Design and Technology Association as Assistant Chief Executive. He is a member of the National Curriculum Expert Advisory Group for D&T and was a major contributor to the final draft of the National Curriculum 2014 programmes of study.

**Course code: AD-1017-T001**
