

Pentatonic Scale & its inversions...

(audio clip comes with this sheet)

From the major scale we take the notes

1 2 3 5 6

Let's try that in a different order (8 and 1 are the same note)

2 3 5 6 8

Carry on moving the notes along

3 5 6 8 2

And again

5 6 8 2 3

and again (lets come down an 8ve tho)

6 1 2 3 5

Hurray we've reached the **minor pentatonic!**

Let's try that using solfege!

do re me so la
re me la so do
me la so do re
so la do re me
la do re me so

It's so great for you to practise the pentatonic & the inversions.

You will be able to create brilliant riffs and runs...impro in RnB, Jazz & Soul styles.

The pentatonic sound is awesome...try improvising with it!
