

ABRSM Grade 3 Aural Tests

Aural tests are listening tests

Everyone does the same tests, no matter what instrument they play

There are 4 aural tests in grade 2

They are usually the final section of the exam

The examiner will tell you where to stand and where to place your instrument

Give your answers confidently and clearly

The examiner probably won't tell you whether you get the answer right or wrong! They usually just say "thank you" after you've answered

Test A

The examiner will play a piece of music on the piano.

Listen first, then clap along with the beat of the music.

Give a louder clap on the strong beats.
This will help you to work out whether the music is in 2, 3 or 4 time.

At the end of the music, the examiner will ask you whether the piece was in 2, 3 or 4 time.

Top Tip!

When you're listening to the radio, clap along or tap your foot in time - it's great practice for this test.

What the examiner says:

First, clap in time while I play. Join in as soon as you can and give a louder clap on the strong beats.

After the piece has finished:

Is it in two, three or four time?

How to tell if it's in 2 or 3 or 4 time

Listen for a strong beat or accent, this will indicate the start of a new bar.

The strong beat is beat number 1 of the bar.

If you clap -
"strong weak strong weak"
that's 1 2 1 2
so the piece is in 2 time.

If you clap -
"strong weak weak strong weak weak"
that's 1 2 3 1 2 3
so the piece is in 3 time

If you clap -
"strong weak weak weak strong weak weak weak"
that's 1 2 3 4 1 2 3 4
so the piece is in 4 time

Test B

What the examiner says:

I'd like you to sing three phrases as echoes. Here is the key-chord (plays) and your starting note (plays)

The examiner then counts in two bars

The examiner will play a short, simple phrase on the piano. You need to listen carefully, and then sing it straight back to the examiner, like an echo.

Once you've finished singing, the examiner will play another phrase for you to echo. Then another! So there are three phrases altogether.

The examiner is not looking for you to be a pop star or opera singer! They're just listening for the accuracy of the notes and rhythm and not the quality of your voice.

Top Tip!

Don't just listen to the notes (pitches) that the examiner plays. Listen to the rhythm and articulation (accents, slurs and staccato) as well

"La" is an easy sound to sing for the echo, but any vowel (or consonant followed by a vowel) is fine!

Test C

Spot the difference!

The examiner will play you a short phrase twice. The 2nd time, they will either change the pitch or rhythm. You need to listen for it, and then tell the examiner how it was different

What the examiner says:

I'll play a phrase twice, but with a change in either the pitch or rhythm the second time. Tell me what the difference was. Here is the key-chord (plays) and the tonic (plays).

The examiner then counts in two bars and plays the phrase for the first time.
and now with the change

The examiner plays the phrases again but slightly differently
How was it different?

Model Answer

The change was near the beginning / end.

It was a pitch / rhythm change.

Pitch:
One of the notes was higher / lower

Rhythm:
The 1st time the rhythm went *clap*
And the 2nd time it went *clap*

Test D

The examiner will play a piece of music to you on the piano and then ask you about the tonality and one of - tempo, articulation or dynamics

Articulation -
smooth and
detached
playing

Tonality - major
or minor key

Tempo - speed

Dynamics -
loud and
quiet playing

What the
examiner says:

Listen to this piece, then I'll ask you about (loud or quiet playing) OR (smooth or detached notes) OR (tempo change) and about major or minor key

Some example questions
below

*At the beginning, were
the notes smooth or
detached?*

*Was there any change in
the speed of the music, or did it
always stay the same?*

*Did the piece
end in a major or minor
key?*

*Did the change from
loud to quiet playing
happen suddenly or
gradually?*

*Where was the quietest
part of the music?*

*Was
the piece in a major or
minor key?*

Assessment criteria

The aural tests are worth 18 marks

Give your answers confidently and clearly

Think about Test A
Is the piece in 2 time or 3 time?

If you don't know the answer - guess!
You've got a 50/50 chance of getting it right!

If you seem unsure or hesitate too long you could lose marks, even though you might have the correct answer.

It's the same for all the tests - give confident answers, even if you don't feel confident!

Distinction:
18 marks

Quick and accurate answers

Merit:
15-17 marks

Good responses

Minor errors or hesitations

Pass:
12-14 marks

Approximately half of the tests answered correctly.
Some hesitation or error

Below Pass:

Slow, uncertain responses
Inaccuracy in all parts of the test

Practice!

The ABRSM have an app for practising the Aural Tests.
You can find out about it and download it here:
<https://gb.abrsm.org/en/exam-support/apps-and-practice-tools/aural-trainer/>

Test A - Practice!

Listen to these pieces, clap along and think about whether they are in 2 time or 3 time. They're a lot longer than the tune the examiner will play in the exam, but it's good practice!

1. Que Sera Sera - <https://www.youtube.com/watch?v=CcWbZUgymkw>
2. Amazing Grace - https://www.youtube.com/watch?v=sire_XjCQjl
3. Radetsky March - https://www.youtube.com/watch?v=eab_eFtTKFs

Listen to the
radio and try to
clap or tap
along

Answers
on the last
page!

Test C - Practice!

These are the kind of changes that you might hear in the exam.
If you have someone else that plays a musical instrument at home, you could ask them to play the phrases to you so you can listen for the change.

Example 1

And now with the change

The change was near the beginning.
It was a pitch change.
One of the notes was lower.

Example 2

And now with the change

The change was near the end.
It was a rhythm change.
The first time it went (clap last 3 notes).
The 2nd time it went (clap last 3 notes of change).

Test D - Practice!

Check out the Grade 2 aural tests for examples of tempo, dynamic and articulation.

Tonality

Think about your scales and the difference in sound between the major and minor scales. Sometimes people say that the major keys sound happy and the minor can sound sad or Egyptian!

Major
