

# Raindrop Lullaby

The raindrop lullaby is an other piece designed to develop a good hand frame but starting in the melancholy key of E minor and move to the calm and happy key of G major. Apart from focusing on the intonation of the Left hand. Try to join up every note with no gaps in between to draw a smooth line and create a calm and soothing atmosphere. As always, it is important that the left hand is soft and relaxed. Train you fingers to drop and lift correctly, quickly and calmly even when the music is slow.

**Andante (slow and smooth)**
